Net cash (used in) provided by operating activities	\$ (13.4)	\$ 27.9
Cash Flows From Investing Activities:		
Capital expenditures	\$ (9.1)	\$ (4.5)
Proceeds from the disposition of property, plant and equipment	0.1	0.1
Net cash used in capital expenditures	\$ (9.0)	\$ (4.4)
Free cash flow	\$ (22.4)	\$ 23.5
Weighted average number of common shares, diluted	40.6	42.4

Note: Net cash flows from capital expenditures and free cash flow are presented as an additional liquidity measure. Generally Accepted Accounting Principles require that Cash Flows From Investing Activities be presented in the Consolidated Statements of Cash Flows. The company uses quarterly trends of net cash used in capital expenditures in determining a free cash flow metric. Free cash flow is calculated by taking operating cash flows and subtracting the net cash used in capital expenditures. The company believes it is helpful to provide readers of its financial statements with a reconciliation of investing cash flows to net cash used in capital expenditures, as it is a key component of the free cash flow metric that the company reviews internally.
